

Postek Programming Interface ReadMe

Overview

POSTEK provides 2 kinds of programming interfaces, both in DLL (Dynamic Link Library) style. They are:

- CDFPSK.dll
- WINPSK.dll

Please read the below information carefully to learn about the interface requirements in order to decide which is right for your needs.

CDFPSK.dll

This file well applies to connections through parallel or serial cable. Label content is sent directly to the print port. Single USB printer to PC connection is also supported, the USB port can be auto detected. Printer driver installation is not needed.

WINPSK.dll

This file applies to all types of connections, including USB (single or multiple USB printing devices) and Ethernet. To call the printer from WINPSK.dll, the printer driver installation is required.
